

# Sound hunt

## Variety of audio files containing sounds that must be solved

The time for team building during a working day is strictly limited although teamwork is an important part of a job. Small methods can help to strengthen and support groups and to ease a school or training day.

Warm - up method for working towards further audio projects.

---

## EXERPT:

Duration: 1 - 2 school periods

Complexity: Low - threshold

Use of media: Audio

Usability:

- Getting an insight of working with audio
- Team building
- Easing the lessons
- Collecting sounds for a audiobook developed later on
- Approach to a work process about sounds

Ways of presentation: As a sound riddle on the school website

Extended possibilities:

- The sounds can be collected and used for audiobooks or other creative audio elements.
- They can be put as a riddle on the school's homepage for example.

Demand: Enjoying dealing with acoustic s and technology.

Room: Classroom

Size of the group:

- Groups of 4

- Total number of group members is dependent on the number of recording devices and smartphones (3 – 4 persons per group are suitable)

Technology:

- Recording devices (mobile phones are also possible ) including communication cables
- speakers Software / web service
- no software necessary in general
- the individual sounds can be put together to a n audio clip with the program Audacity, if needed.

Example project: The method sound hunt serves the sensitization of one's own environment in the first place. It can also be put online, of course: [http://www.max - weishaupt - realschule.de/sonstiges/geraeuscheraetsel/geraeusche.html](http://www.max-weishaupt-realschule.de/sonstiges/geraeuscheraetsel/geraeusche.html)
