The digital atelier focuses on team building activities while incorporating elements of different subjects and ICT tools. It is applicable in different contexts: can be used solely in the class or it can be used to create closer, understanding relations between class, parents, school and community in general. It is aimed at different skills development through active, creative tasks. The workshop also encourages common activities between all class members, encouraging involvement of the "quiet" and introverted ones.

### **Civic engagement:**

Linking students – teachers – parents – community members with a common activity. Increasing parents, teachers, community members' awareness on technologies. Workshop might be used to organise "Family day" in school. Organising the workshop during city festival (organising teams of people). Activity might be perfectly used in a multinational group as a team building activity. Might be used at the beginning of school year.
