APP YOUR SCHOOL NATIONAL TOOLKIT LITHUANIA

Information about the resource

Publisher: project App Your School

Rights: public domain

The App Your School National Toolkit Lithuania is written in Lithuanian and was elaborated by a group of experts lead by the Lithuanian partner Edukaciniai Projektai, based on the methodologies and the digital ateliers experimented in the project. The National Toolkit gives an example of "how to do" and "what to do" in the national language, to support teachers wishing to implement the approaches of the project in their own country. The toolkits focus on the new format of the "digital atelier" developed and experimented within the project, on students' media competencies and the creative use of the new media and apps. The Lithuanian Toolkit presents 15 Digital ateliers: 5 national cases and 10 experimentated in other countries, which are closer and achievable in reference to the national context.
