Today, the Internet is a central part of our and our children's lives, but how does it actually work? In this picture book children can learn more about the internet in a playful and educational way. The book is an illustrated story for children in elementary school. The purpose is to encourage curiosity among children on how the Internet works and stimulate discussions about technology in the classroom. The book has been produced in cooperation with educators at the National Museum of Science and Technology in Sweden.
